

Mr. Wim Elfrink addressed CyberTech at All-hands meeting

Chairman of CyberTech Advisory Board provides an insight of Enterprise Spatial Analytics

NEWS PROVIDED BY

CyberTech Systems and Software

11 April, 2017.

Mr. Wim Elfrink, Chairman of CyberTech Advisory Board (President & Founder – WPE Ventures Digitized Solutions), expressed his views on CyberTech’s vision in All-hands session. He focused on how Enterprise Spatial Analytics can be used to deliver user focused analytics solutions.

Mr. Elfrink, pioneer in IoT and one of the masterminds behind company’s vision, said “Increasingly everything will be connected to everything”. Advanced Spatial Analytics of enterprise data can deliver unprecedented decision making power for businesses. It can be applied to almost all the industries including Public Safety, Health Care, Smart Cities, Utilities, and others to perform ready-to-act analytics.

He continued on how spatial analytics can be delivered as a service to add location context, provide real time data aggregation, actionable workflows, and much more. Wim said that with the increasing trend in digitalization huge amount of data is being generated, Enterprise Spatial Analytics will help industries visualize and analyze this data in the desired format.

About CyberTech Systems and Software: CyberTech is the leader in Next-generation Spatial and Location Analytics. CyberTech’s Spatial Analytics products GeoShield, GeoCivic, CyberServe and GeoServe cater to broad vertical markets. For more information, please visit our web site www.cybertech.com
